■ 10-inch PitBoss™ Cleaning Pigs

Description

TDW's PitBoss™ Cleaning Pig is designed to remove soft to medium-hard deposits from internal pits while also serving as an excellent general purpose cleaning pig. It is essential to remove deposits from pits in order to allow corrosion inhibitors and biocides to work. Otherwise the deposits can shield the active corrosion, there by allowing the cell to continue its corrosive action. Each wire scraper acts independantly as both a spring (forcing itself out into the pit) and a scraper

Features

Pit cleaning wire brushes are designed to improve the effectiveness of corrosion inhibitors, thus reducing the risk of leaks due to internal corrosion. Brushes are designed to conform to the inside diameter of pipe, regardless of wall thickness, to effectively clean the pipe wall.

Options

T.D. Williamson, Inc., is committed to providing you with the exact product to assist you in planning, budgeting, and meeting the specifications for your individual application needs.

To help you obtain the proper pig for your application, check to see if the selection is capable of traversing your particular pipeline components (bends, valves, tees, etc.)

- PitBoss Cleaning Pigs are available in sizes 6-inch (150 mm) and larger.
- PitBoss Cleaning Pigs are available in dual diameter configurations.
